

News from Kibera

For the past few years, by helping to market hand-made crafts and sometimes through our direct contributions, First Church has helped support an artisan's community and a school in Kibera, a large impoverished community outside of Nairobi, Kenya. With our support and the work of its dedicated teachers, the Sosep School in Kibera is attracting more students every week. Now there are not enough chairs to go around, and some students are sitting on the ground. All the children are trying very hard to get to school each morning because they are all assured that once they are in school they will get breakfast and lunch. With the help of First Church members the community has recently constructed a chicken coop and purchased some young chickens. This will help the people of Kibera as a source of food and additional income.
